# Our Mission

Royaa's primary Mission is to take care of her customers. We are proud of our ability to serve them in a timely and helpful manner. Our aim is to provide highest quality ICT solutions at a reasonable and affordable price. We seek to develop long-term relations with them.

With our objective in mind, we strategize in continuing to building on the strength of our brand which is that of helping our clients achieve successful result and enable Agent companies such as IBM & Cisco to touch millions of customers each day, whether these transactions and interactions take place across the country by telephone or over the Internet.

Manipulations with Hardware, Software and Solutions that make these interactions easier, more convenient and more relevant to our customers are the business code of ethics of Royaa.

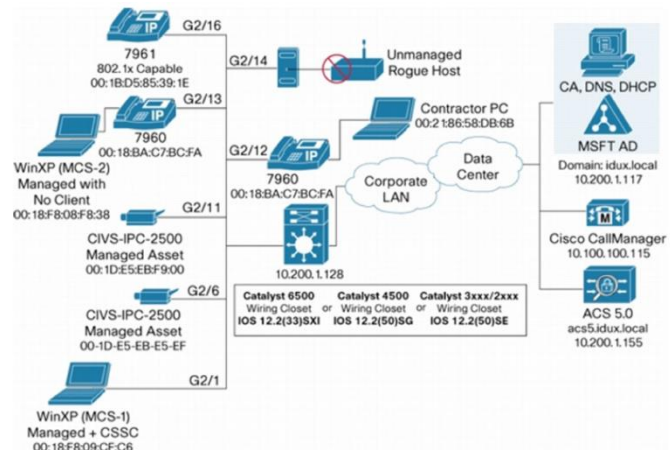

“Our vision is to give our customers the tools they need to gather critical data about their individual preferences, needs and requirements.”

## Our Activities

Royaa builds, design and support networks active and passive combined. These networks are built-in and for institutions that require high security such as financial (banks), mission critical institutions (hospitals and governmental corporations), in retails chains as well as university campuses.

## Passive and LAN Implementations

Royaa provides complete design, installation, testing and warranties for cabling infrastructure systems. The designs and installation can be for voice and data cabling infrastructure systems for offices, buildings campuses, labs, hotels following the EIA/TIA & IEEE standards. Furthermore, at the end of a project, we supply our customers with the installed systems, complete with as-built drawings for each installed node.

**THE FOLLOWING ACTIVITIES ARE INCLUDED IN THE PASSIVE WORKS:**

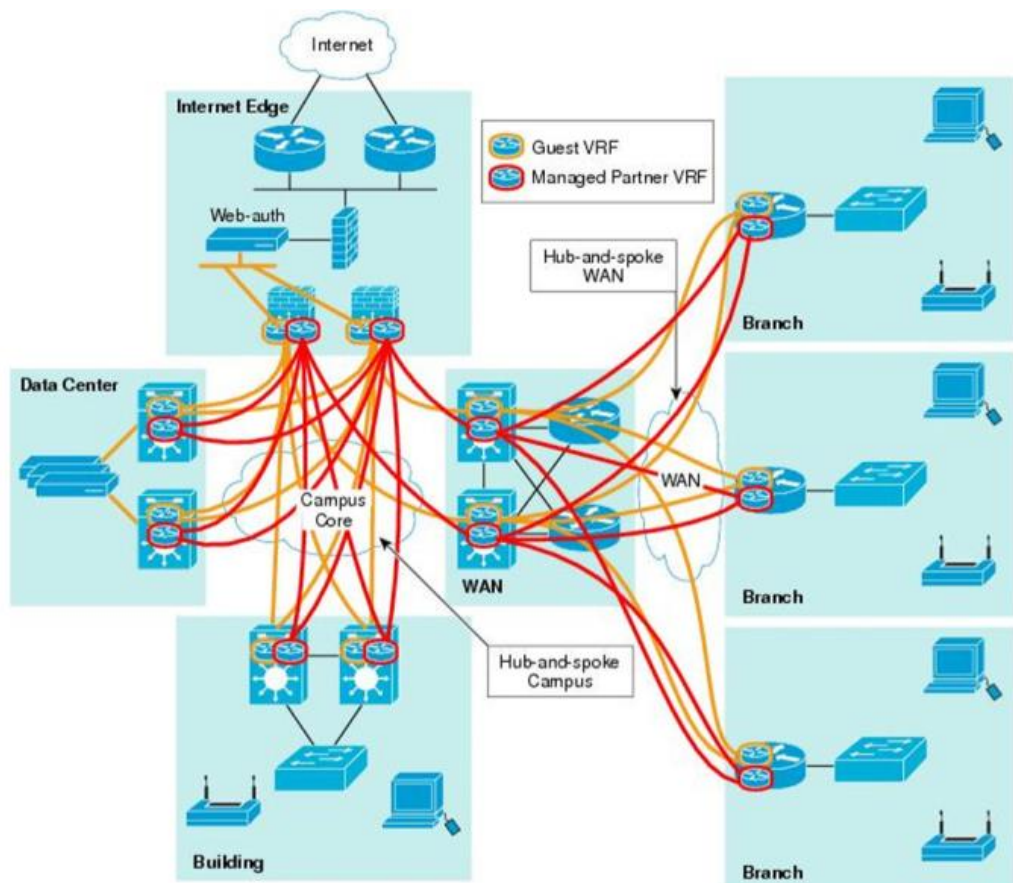

- UTP cable pulling, termination, testing and commissioning and labeling
- Fiber cable pulling, termination, testing and commissioning and labeling
- Cabinet and Rack installations,
- Cable Tray installations
- EMT, flexible steel and plastic flexible Pipe Fixing

## Design and Consulting of WANs

Royaa provides design and consulting services for customers' existing WAN networks. We work with our customers to develop the best solutions that will meet their technical requirements and fit their budget. Further to that, our consulting services include conducting site survey, project management plans, communication and coordination with other parties involved.

In addition, we offer on-going support and troubleshooting for LAN & WAN devices. We do traffic diagnostics on the LAN & WAN, environment evaluation of server loads, correct server sizing as well as measuring switching and routing requirements. The support extends to VPNs, Firewalls and more.

At the end of a project, we supply a complete set of documentation to support the installed systems.

# Wireless Networks

Securely, reliably and seamlessly, our wireless LAN creates a resilient network environment for users and workers to interact and collaborate with each other with critical data anytime and anywhere.

## Access Points (Indoor & Outdoor)

Royaa understands the desire for customers to have a peace of mind while interacting with others in the work environment. As such the highly secured and reliable wireless performance of their access points is an imperative they have at heart. It is geared towards industrial needs but also affordable for small and medium size businesses.

# Security Solution

Royaa Security solution consists of a comprehensive range of solutions that delivers high level security compared to other relevant industries in the same domain.

## CCTV Solutions

Royaa specializes in providing CCTV systems which meet the requirements of a variety of property types such as retail premises, educational establishment as well as industries and offices.

## IP Camera Solution

From high-definition megapixel to standard-definition IP Cameras, Royaa Network solutions offers the broadest array of fixed and positioning cameras available. These open systems deliver unparalleled functionality, high-resolution image quality and full frame-rate video, bringing clarity and precision to your unique applications.

## Access Control

Our access control system offers an impressive set of advanced features made available by today's sophisticated technology which is an attractive option to control building access for facilities of every size.

## Handling Our Accounts

Royaa handles her IT infrastructure accounts from A to Z. We are keen to have a continuous relationship with the institute we deal with. It is done as follows:

1. We make a survey on the whole existing infrastructure.
2. List of inventory
3. Decide upon the depreciated products.
4. Make an action plan, considering the budget.
5. Upgrade the system.
6. Consolidate the system
7. Supply the account with all the needed products and services with:
  - a) Best market prices.
  - b) Premium quality
  - c) Quick delivery dates.
8. Implementation phase
9. Maintenance and care packs.
10. Services
11. Consultation
12. General Contractors
13. Marketing Campaigns
14. Solutions
